

5/27/2016

Faranah, Upper Guinea

Republic of Guinea

**CERTIFICATE OF GOOD COMPLETION**To whom it may concern

I, Andrew Kovarik, Program Director for the Agriculture Education and Market Improvement Program implemented by Winrock International, certify that the company SalvaTerra SAS, based in Paris, France, carried out, as consultant, **the baseline study of a project aiming at including climate issues in vocational training and extension delivery in Guinea (AEMIP Project)** for a total amount of **23,570 Euros**, between **March 2014** and **April 2014**. The services consisted in:

- **Data collection:** (i) Review of the international literature, (ii) Semi-structured questionnaires (over 160) to seven stakeholder groups (teachers of agricultural education, students, agricultural researchers, members/leaders of farmers' umbrella, members/leaders of farmers' groups, private entrepreneurs, rural radio), (iii) Semi-structured bilateral talks with resource persons (Ministries in charge of Agriculture, Forestry, Livestock, Fisheries, Environment, Advisory and Extension Services, Agricultural Research Institute, National Confederation of farmers' groups, National Confederation of livestock farmers' groups, donors active in rural development, etc.);
- **Analysis:** (i) *State of the art* in terms of adaptation of agriculture to climate change and climate-smart agriculture in the world, West Africa and Guinea, (ii) Assessment of the ex-ante level of understanding on these issues among the seven stakeholder groups.
- **Short-term recommendations:** (i) To inform and to educate massively on climate change, (ii) To train on these issues (civil servants working in the rural sector, agricultural researchers, teachers and students of agricultural education, farmers' leaders, etc.), (iii) To identify adaptation measures for the major farming systems, in order to fine-tune teaching and extension delivery.

I confirm that the activities were carried out by SalvaTerra SAS in accordance with the terms of the contract, including the results agreed upon and the agreed deadlines. My institution has been satisfied by the performance of SalvaTerra SAS. The baseline study implemented by SalvaTerra has been important in guiding project implementation concerning Climate Smart Agriculture. The certificate is delivered to SalvaTerra SAS upon Company's request, for all pertinent purposes.

Andrew Kovarik

Program Director
