

CURRICULUM VITAE

Proposed role :

Levels of expertise (senior, junior) : Senior

Last name : CHAKIB
First name : Anis
Date and place of birth : 20 April 1986, Paris
4. Nationality : French
5 Civil status : In couple
Contact: +33 689 805 402, a.chakib@salvaterra.fr

Training :

<i>Establishment</i>	Institute of Life and Environmental Sciences and Industries (AgroParisTech, France)
<i>Date</i>	September 2009 to June 2012
<i>Diploma(s) obtained</i>	AgroParisTech engineer

<i>Establishment</i>	University of Montpellier II (France)
<i>Date</i>	September 2008 to June 2009
<i>Diploma(s) obtained</i>	Master 1 Engineering in Ecology and Biodiversity Management

7. knowledge of languages (per competence from 1 to 5, 5 being the maximum) :

<i>Language</i>	<i>Level</i>	<i>Read</i>	<i>Spoken</i>	<i>Written</i>
French	Mother tongue	5	5	5
English	Current	5	5	5
Spanish	Current	5	5	5

8 Professional associations or bodies :

9 Other qualifications (e.g. computer skills etc.): GIS: Arcgis, HQis. Statistics: SPSS, S-Plus.

Current position : Agriculture and Rural Development Expert at SalvaTerra

11. years of professional experience: 9 years

12 Key qualifications: Rural development and natural resources sustainable management projets (feasibility studies, technical assistance and evaluations); Study of agricultural and forestry production systems and value chains in developing countries: Litchi, vanilla, cocoa, coffee, groundnuts, Cape peas, cotton, etc.; Study of regulatory frameworks and sectoral public policies in the field of climate, environment, agriculture, forestry and land-use planning: National Land Use Plan, agricultural policies, forest conservation, National Agricultural Investment and Food Security Policy; Agricultural policies for adaptation and mitigation in Latin America, etc.; Support/advice to training institutions and agricultural producers' organisations. Advice on agronomy, internal organisation, good governance and accounting management, access to national and international markets, training in climate-smart agriculture; Good agricultural practices in Latin America. Studies and support/advice for the implementation of certifications (organic, fair trade, sustainable) of agricultural and forest products: Cocoa, shea, cashew, fruit and fair trade handicrafts (FairTrade Max Havelaar-FLOCERT, Fair For Life-ECOCERT, WFTO, FPP) and Socio-economic studies, participatory mapping in rural areas, sociology of organisations, analysis of stakeholder strategies and gender approaches in developing countries.

13 Professional experience :

<i>Date</i>	January 2017 to now
<i>Location</i>	Paris
<i>Company</i>	SalvaTerra
<i>Post</i>	Expert
<i>Description</i>	<p>Expertise in the fields of agriculture, climate, forestry and energy: national/regional strategies and climate change adaptation plans, project feasibility and development, sectoral analyses, vulnerability studies, assessments, technical advice and assistance, capacity building and training. For example :</p> <ul style="list-style-type: none"> - WB/PIC-3 – Madagascar – 10/22 to ongoing: Identification and evaluation of the potential of the export agricultural value chains along the eastern coast: vanilla, cloves, coffee, litchi, cinnamon, pepper, ginger, turmeric, essential oils, honey, fruits, chili, etc. - AFD – Central Africa (5 countries) – 12/22 to ongoing: Final evaluation of the Public/Private Partnership for Sustainable Forest Management of Central African project (P3FAC), 2017-2022. - AFD – Mali – 09/21 to 12/22: Technical assistance to the National Bank for Agricultural Development (BNDA) of Mali for the development and implementation of a climate strategy in the agricultural and renewable energy sectors. - World Bank - Haiti - 12/19 to 01/20: Preparation of 20 technical fact sheets for the dissemination of climate-smart agricultural innovations in the Caribbean (practices, systems, technologies, varieties, etc.) as part of the project (RESEPAG 2) in Haiti. - AFD/FFEM - 6 West African countries - 10/18 to 02/19: Retrospective evaluation of the Fair Trade program "Supporting the development of Fair Trade in West Africa" (phase 1) and feasibility study for a new Fair Trade program 2 "Consolidating Fair Trade commodity chains and representation networks to make the ecological and social transition in West Africa". Study of the cocoa, shea, cashew nut, fruit (mango, etc.) and handicrafts sectors: adaptation to CC, good agricultural practices, etc. Gender approach. - DAAF Martinique - Martinique - 10/18 to ongoing: Participatory elaboration of the Regional Forest Wood Programme (PRFB). Study of agroforestry production systems (including biodiversity linkages) and issues of vulnerability of forests and agroforests to climate change. Facilitation of stakeholder meetings for the development of an action plan. - Expertise France - Latin America (17 countries) - 05/18 to 08/18: Evaluation of 36 project proposals and 15 project documents submitted in the framework of a call for projects under the "Resilient Food Production" component of the EUROCLIMA+ programme (funded by the European Commission). Analysis of project contexts, relevance of actions, technical and organisational feasibility, structure and content of the logical framework, etc. - AFD - Guinea - 03/18 to 04/18: Feasibility study for a sustainable agricultural development project in Guinea's Dabola groundnut basin Diagnosis of the groundnut sector. - World Bank - Madagascar - 12/17 to 06/18: Studies of agricultural cash crops (cashew nuts, groundnuts, coffee, cocoa, cotton, pink berries, dried grains, cloves, lychees, honey, moringa, pepper, vanilla, etc.) and support for the formulation of sustainable development strategies for the commodity chains and action and adaptation plans (climate-smart agriculture) within the framework of the component "Promoting the sustainable development of agribusiness". - Expertise France - Ecuador (17 Latin American countries) - 05/17 to 07/07: Technical and methodological support for the organisation of a multi-stakeholder/multi-country consultation workshop for the "Resilient food production" sector of the EUROCLIMA+ programme. Drafting of a methodological note and 4 thematic notes (efficient use and management of water, good agricultural practices for adaptation/mitigation, good livestock practices and climate funds and financing for agriculture). - DAAF Mayotte - Mayotte - 02/17 to 07/17: Evaluation of European agri-environmental measures (EAFRD) in the context of the CC and aimed at supporting agroforestry ("Mahorais garden"), hedgerows, ripisylves, wet meadows, reduction of soil erosion, adoption of cropping routes with sowing under plant cover. - USAID - Guinea - 03/17 to 04/17: Training in climate-smart agriculture (CIA) provided to a group of teacher-researchers and managers and technicians of regional agricultural support agencies. AIC concept, practices and technologies. Methods for evaluating the pillars of AIC productivity/income /food security, adaptation and mitigation. Ecosystem (goods and services) and landscape approach. Methodology for carrying out an IYC plan. CGIAR-CCAFS tools and methods: Climate smart agriculture prioritization framework, Mitigation optimization tool, CSA Rapid appraisal, FAO EX-ACT, etc.

<i>Date</i>	July 2016 to December 2016
<i>Location</i>	Paris
<i>Company</i>	IDDDRI Sciences Po
<i>Post</i>	Research consultant
<i>Description</i>	Meta-analysis on the implementation and effectiveness of initiatives for the sustainability of the palm oil sector (RSPO, RSPO Next, SAN, ISPO, etc.). Comparative analysis of the content of the initiatives. Relational and strategic analysis of the initiatives. Study of the deployment of the initiatives in the sector and their impact on the organisation of the sector. Study of the social and environmental impacts of the different initiatives . Study of the HCV and HCS approaches.

<i>Date</i>	February 2015 to February 2016
<i>Location</i>	Antsiranana (Madagascar)
<i>Company</i>	Gardens of the World
<i>Post</i>	Responsible for plant production and certification
<i>Description</i>	Development of the production, drying and marketing of certified organic and fair trade medicinal and cosmetic plants in collaboration with producer groups in northern Madagascar. Capacity building and improvement of the organisation of producer groups (OPA), agronomic advice and monitoring (agroecology, good practices of climate-smart agriculture, implementation and monitoring of organic and fair trade certification (ECOCERT), customer relations in the cosmetics industry, etc.

<i>Date</i>	September 2013 to December 2014
<i>Location</i>	Puyo (Ecuador)
<i>Company</i>	Universidad Estatal Amazonica (UEA)
<i>Post</i>	Research Engineer
<i>Description</i>	Agricultural and socio-economic surveys of 250 farming households producing cocoa, coffee, maize, taro, livestock, etc. in the Ecuadorian Amazon. Household vulnerability study using DFID's Sustainable Livelihoods (Human, Social, Natural, Physical and Financial Capital) approach . Statistical analyses of socio-economic and agricultural data (PROFORMAL project, CIFOR-UEA and UEA-University of Missouri project). Tutoring of agricultural and environmental engineering students.

<i>Date</i>	March 2013 to August 2013
<i>Location</i>	Agadir (Morocco) and Montpellier
<i>Company</i>	GEODD Programme
<i>Post</i>	Research consultant
<i>Description</i>	Study of the argan oil sector and the dynamics and strategies of the actors of the sector in Morocco . Analysis of national framework documents and national and international initiatives for the development of the sector. Analysis of good practices and support initiatives for takeover bids (agricultural credits, capacity building, etc.). Critical approach on the paradoxes of sustainable development within the argan oil sector.

<i>Date</i>	July to September 2011
<i>Location</i>	Paris
<i>Company</i>	NFB International
<i>Post</i>	Assistant in charge of studies
<i>Description</i>	Study of the development potential of REDD+ in the Mediterranean basin. Maghreb and Near East. Support to the identification of pilot sites for the development of activities on climate change adaptation and mitigation in five Mediterranean countries. Study of ecosystem goods and services associated with different types of Mediterranean forests in different contexts. Production of communication documents.
