

# David COMBAZ

**Associate expert**

**Agriculture, environment, and forestry**

**SalvaTerra SAS - [www.salvaterra.fr](http://www.salvaterra.fr)**

<b>Last name:</b>	COMBAZ	<b>First names:</b>	David, Christophe
<b>Date of birth:</b>	20/08/1985	<b>Marital status:</b>	Married
<b>Nationality:</b>	French	<b>Skype:</b>	d.combaz
<b>Cell phone:</b>	+33 6 88 13 66 35	<b>Email:</b>	<a href="mailto:d.combaz@salvaterra.fr">d.combaz@salvaterra.fr</a>

## Diplomas:

<i>Institutions</i>	<i>Dates</i>	<i>Title of diploma awarded</i>
Agroparistech, HEC Paris	2011 - 2012	Advanced Master's in International Management of Forest, Nature, and Society
University of Montpellier, Agroparistech, National Museum of Natural History	2009 - 2010	M2 in Integrated Territorial Development and Planning
University of Montpellier	2008 - 2009	M1 in Ecological engineering and biodiversity management
University of Montpellier	2006 - 2008	Bachelor's degree in Organismal Biology, specialization in Ecology

## Languages (1 - excellent; 5 - basic):

<i>Language</i>	<i>Lu</i>	<i>Spoken</i>	<i>Written</i>
French	1	1	1
English	1	1	1
Spanish	1	1	1

## Computer and other skills:

Windows/Mac/Linux. Word, Excel, PowerPoint, and open-source equivalents. GIS: QGIS. Statistics: R. Photographic editing: Adobe Lightroom and Photoshop, drone shooting.

## Key Skills and Abilities:

- **Agroecology, climate-smart agriculture, and agroforestry:** feasibility studies and technical assistance for the development of climate-smart agriculture and nature-based solutions for the adaptation of agricultural systems to climate change (Burkina Faso, Mexico, Haiti, Madagascar, Dominican Republic).
- **Development of value chains for agricultural and forestry products:** feasibility and assessment studies and project implementation to develop various value chains, including non-timber forest products (Cameroon), cocoa (Cameroon), coffee (Mexico, India), honey (Mexico, Ethiopia), handicrafts (Mexico), wood (Cameroon, Gabon, Central African Republic, DRC, Congo), palm oil (Cameroon, Indonesia).
- **Vulnerability and adaptation to climate change:** vulnerability assessments in rural areas (Madagascar, Dominican Republic) and feasibility studies for adaptation initiatives at the local, regional, or national scale (Madagascar, Dominican Republic, Congo, Niger).

- ***Climate change mitigation forestry projects:*** environmental and social impact assessments and other evaluation studies of national and sub-national REDD+ projects and policies (Madagascar, Indonesia) and reforestation and afforestation projects (Congo, Gabon, Togo). Excellent knowledge of VCS and CCBS methodologies, the Cancun framework, and World Bank Group environmental and social standards. Occasional lecturer for specialized students in various French universities.
- ***Regulatory frameworks and sectoral public policies: climate change mitigation and adaptation, agricultural development, forestry, and land use planning and biodiversity conservation.*** REDD+ strategies (Madagascar, Congo, Gabon, Togo), NDC implementation (Niger, Togo, Dominican Republic), national adaptation plans and climate change policies (Niger, Dominican Republic), land tenure, forestry codes and environmental law (Cameroon, Gabon, Central African Republic, DRC, Congo, India, Madagascar).

#### **Country Experience:**

<i>Country</i>	<i>Dates</i>
Ethiopia	October 2018
Mexico	May 2013 to September 2018
Cameroon	August to October 2012
Congo	October 2020; June 2022; September 2022; November 2022
India	March 2012
Indonesia	May to August 2009; October 2022
Burkina Faso	July - August 2007; July - August 2008
Madagascar	May 2019; November 2019
Niger	October 2021; July 2022
Dominican Republic	January 2020

## Professional Experience:

<i>Dates</i>	<i>Location - employer</i>	<i>Position and customer reference</i>	<i>Description</i>
Since October 2018	France, SalvaTerra	Expert in forestry, agriculture, environment and rural development	Expertise and development of projects related to agriculture, forestry and rural development in the South.
Since September 2020	Tunisia (remote), SalvaTerra	Backstopping Sandrine JAUFFRET <a href="mailto:sjauffret@worldbank.org">sjauffret@worldbank.org</a> +1 240-736-8251	<b>Backstopping on a feasibility study for the World Bank:</b> support to oases in southern Tunisia: identification and implementation of climate change adaptation actions, promotion of their function as carbon sinks, support to income generating activities and employment.
October to November 2023	Indonesia	Head of mission Under confidentiality agreement	<b>Audit of the Indonesian mahogany, cassia and jackfruit supply chain of a French luxury group.</b> Audit of the production centers and second and third tier suppliers of the group in question, on the criteria of Human Rights and workers' rights, Health and safety at work, Environment, Fight against corruption, Confidentiality, etc.
May to October 2022	Niger, SalvaTerra	Irrigation expert Richard COLBACK <a href="mailto:rcolback@ifc.org">rcolback@ifc.org</a> +1 202-458-4844	<b>Market study for the financing of small-scale private irrigation for</b> vegetable and tree production in Niger for the International Finance Corporation (IFC), in consortium with Horus Développement Finance and BNIC. Study of existing and potential demand in terms of irrigation solutions and financing (production areas, existing business models, key actors, constraints, etc.), segmentation of the supply of equipment and financing solutions, assessment of trends in access to irrigation financing in Niger.
Since March 2022	Congo, SalvaTerra	Head of mission Pierre TATY <a href="mailto:pierretaty@yahoo.fr">pierretaty@yahoo.fr</a>	<b>Environmental and Social Impact Assessment (ESIA) to World Bank standards for a 40,000 ha afforestation project</b> , including 2,000 ha of agroforestry and agroecological developments managed by communities. Project financed by private investments (under confidentiality agreement), within the framework of the National Reforestation Program (PRONAR) of Congo. Coordination of a team of 20 experts mobilized on the biodiversity and social aspects of the study.
October 2021 to October 2022	Togo (remote) SalvaTerra	Head of mission Aniko POLO-AKPISSO +228 99 40 21 45 <a href="mailto:aniko.polo-akpisso@undp.org">aniko.polo-akpisso@undp.org</a>	<b>Assessment of the integration of Togo's Nationally Determined Contributions (NDC) objectives into the planning of the Agriculture, Forestry and Other Land Use (AFAT) sector.</b> Development and testing of climate integration tools for sectoral planners, capacity building of future users, and production of an advocacy document for decision makers (senior officials of the ministries in charge of Agriculture, Forestry and Environment). Financed by UNDP within the framework of the project "Support to the NDC of Togo".
June to October 2021	Niger, SalvaTerra	Expert in climate change adaptation Moussa GOUSMANE <a href="mailto:moussa.gousmane@undp.org">moussa.gousmane@undp.org</a>	<b>Assessment of capacity building needs of higher education institutions, key ministries and civil society involved in climate change adaptation</b> at the national level. Development and implementation of training modules for ministries, CSOs and training institutes on: (i) climate change knowledge, (ii) legal and institutional framework for adaptation, (iii) risk analysis and vulnerability studies, (iv) planning and identification of adaptation options, (v) financing, and (vi) monitoring and evaluation of adaptation

December 2020 to October 2021	Congo, SalvaTerra	Backstopping Mathieu AUGER-SCHWARTZENBERG <a href="mailto:augerschwartzenbergm@afd.fr">augerschwartzenbergm@afd.fr</a> +33 1 53 44 86 66	<b>Feasibility study of the Sustainable Land Use Program (SLUP) in Congo (35 M€) and elaboration of a financing proposal of 20 M€ for the European Union (EU).</b> Structuring of the program, institutional set-up, formulation of activities related to the National Land Use Plan (PNAT), the National Land Use Plan (SNAT), the Departmental Land Use Plans (SDAT), etc. Funding: Central African Forest Initiative (CAFI) and Agence Française de Développement (AFD)
June 2020 to December 2022	Ivory Coast (remote), SalvaTerra	Backstopping François Vince <a href="mailto:vincef@afd.fr">vincef@afd.fr</a>	<b>Inventory of agrometeorological services in Côte d'Ivoire.</b> Realization of an inventory of meteorological stations and mapping of the observation network at the national level, a state of the climatic and meteorological services developed by the public and private actors and comparison of the services in the sub-region, an evaluation of the demand for climatic services in Côte d'Ivoire (needs of agricultural users). Donor: AFD. Consortium with EGIS, Meteodyn, IRD and Carbonium
February 2020 to July 2022	Madagascar, SalvaTerra	Expert in rural development Emmanuel FOURMANN <a href="mailto:fourmanne@afd.fr">fourmanne@afd.fr</a>	Cross-cutting expert for the feasibility study of the project "Talaky Be - Adaptation of agriculture to climate change and strengthening the resilience of rural communities in South-East Madagascar", extension of an integrated land management project based on the landscape approach in the Anosy region. <b>Drafting of a project proposal to be submitted to the French Development Agency (20 M€) and the European Union (20 M€).</b>
June 2019 to October 2021	Dominican Republic, SalvaTerra	Head of mission Elodie AFONSO + 33 6 22 94 44 32 <a href="mailto:afonsoe@afd.fr">afonsoe@afd.fr</a>	General coordination and backstopping for two studies in the framework of AFD's Adapt'Action program: i) Study of the vulnerability of the agricultural sector to climate change. In-depth analysis of production systems and value chains of bananas, cocoa, coffee, beans, plantains, and rice. <b>Analysis of climate-smart agriculture and agroecological best practices, development of CC adaptation plans.</b> ii) Baseline study of climate services for the agricultural sector, and feasibility study for their improvement. In collaboration with EGIS water, Carbonium and Meteodyn.
October to December 2020	Congo, SalvaTerra	Head of mission Pierre TATY <a href="mailto:pierretaty@yahoo.fr">pierretaty@yahoo.fr</a>	<b>Environmental, social and governance (ESG) due diligence study for a 40,000-ha afforestation project</b> , including 2,000 ha of community-managed agroforestry and agroecological developments. Analysis of existing pressures on neighboring protected areas and other conservation, land tenure, and community use rights issues. Assessment of the project's potential contributions to the local economy and access to services. Developed recommendations to bring the project into compliance with the World Bank's Environmental and Social Standards (ESS). Project conducted by a private company in collaboration with the Government of Congo (PRONAR).
Since December 2019	France	Lecturer Raphaël MANLAY <a href="mailto:raphael.manlay@agroparistech.fr">raphael.manlay@agroparistech.fr</a>	<b>Lecturer at Agroparistech, in the "Tropical Forests and Climate Change" module for students in Environmental Management of Ecosystems and Forests (GEEFT) and Management, Nature and Society International (MNSI). Lectures</b> on regulatory and voluntary carbon markets, and on the design and implementation of carbon projects (Nature-Based Solutions) in the Agriculture, Forestry and Other land-uses (AFOLU) sector: Afforestation/Reforestation, REDD+, fuel switch, etc. Supervision of practical work on carbon projects: baseline scenario and calculation of emission reductions, additionality, leakage management, financial evaluation, etc.
July to September 2019	Congo (from France), SalvaTerra	Forestry/land use expert Mathieu AUGER-SCHWARTZENBERG <a href="mailto:augerschwartzenbergm@afd.fr">augerschwartzenbergm@afd.fr</a> +33 1 53 44 86 66	<b>Pre-feasibility study for the definition of an AFD land use planning program</b> to support the implementation of the Republic of Congo's CAFI/REDD+ national investment plan. Bibliographic study of the regulatory context and existing planning documents; conduct of interviews, analysis and formulation of recommendations for development strategies based on agroecology and forest conservation. In collaboration with Biotope.

February to April 2019	France, SalvaTerra	Forestry and wood expert Henri DE REVEL +33 1 44 68 18 56 <a href="mailto:h.derevel@franceboisforet.fr">h.derevel@franceboisforet.fr</a>	<b>Evaluation of the eMOBOIS program.</b> Documentary analysis, semi-structured interviews with operators of the forestry-wood sector, online survey. Analysis of the implementation, results, and effects of the program. Recommendations to set up the conditions for the success of the program in the future and for its good articulation with the "digital chain" program. Recommendations for the positioning of France Bois Forêts (FBF) on the interest of prolonging or not the financing of the program.
January to May 2019	Congo (from France) SalvaTerra	Backstopping Christophe DU CASTEL <a href="mailto:ducastelc@afd.fr">ducastelc@afd.fr</a>	<b>Coordination and backstopping of the final evaluation of the AFD-DFID project for the implementation of the VPA-FLEGT between the Republic of Congo and the European Union.</b> Elaboration of the mission's methodology, establishment of contractual agreements for the evaluation team, backstopping of all materials produced, consolidation of the final evaluation report.
September 2019 to April 2020	Madagascar, SalvaTerra	Forestry expert Odin TSIANDRONGO <a href="mailto:padap.cim@gmail.com">padap.cim@gmail.com</a>	<b>Contribution to the elaboration of the Sustainable Landscape Management Plan (SLMP)</b> of the lazafo area for the Sustainable Agriculture by Landscape Approach Project (SLAP), financed by the World Bank and the AFD. Diagnosis of agricultural and forestry activities, characterization of uses and practices related to the wood resource (energy wood and timber), facilitation of multi-stakeholder consultation workshops, development of proposals for sustainable management of the resource.
December 2018 to June 2020	Madagascar SalvaTerra	REDD+ Expert Lanto ANDRIAMANPIANINA +261 3311 87992 <a href="mailto:lanto@wcs.org">lanto@wcs.org</a>	<b>Third-party assessment of the "robustness" of carbon credits generated by the Makira Forest Protected Area REDD+ mega-project in Madagascar,</b> to assist a private company in its carbon offset strategy. Review of all project documentation against VCS and CCBS methodologies and baseline requirements, field visit to the project area to assess stakeholder and community engagement, leakage management and benefit sharing procedures. Analysis of the vanilla and clove value chain, assessment of agro-ecological practices implemented. Evaluation of the overall quality of the carbon investment offer and strategic advice to the company's management.
December 2018 to March 2019	Indonesia (from France), SalvaTerra	REDD+ Expert Reference under confidentiality agreement	<b>Third-party assessment of the "robustness" of the carbon credits produced by the Merang peatland restoration and conservation project in Indonesia,</b> to assist a private company in its carbon offset strategy. Document review of all project documents, interviews with key stakeholders and production of a summary project assessment report.
October to December 2018	Ethiopia, SalvaTerra	Project Manager Adnan ATWA (UNIDO) +43 1 260 26 33 03 <a href="mailto:a.atwa@unido.org">a.atwa@unido.org</a>	<b>Feasibility study of a project to support honey exports from Ethiopia to the European Union.</b> Review of the normative framework on quality, sanitary and phytosanitary residue levels, and conformity assessment requirements for honey products. Characterization of the Ethiopian honey value chain and assessment of infrastructure and quality service needs to meet EU import requirements. Development of a project proposal on behalf of UNIDO.
October 2018	France SalvaTerra	Expert in agroecology Aur�lie AHMIM-RICHARD +33 1 53 44 33 52 <a href="mailto:ahmim-richarda@afd.fr">ahmim-richarda@afd.fr</a>	<b>Revision of the identification notice of the project "Collective and contextualized strategies for the promotion of a resilient and sustainable agricultural production in the Mediterranean rural areas"</b> for the Scientific and Technical Committee of the French Global Environment Facility.
May to August 2018	Latin America (from Mexico), SalvaTerra	Expert in agriculture and agroecology Julia CHARBONNIER +33 1 70 82 73 50 <a href="mailto:Julia.charbonnier@expertisefrance.fr">Julia.charbonnier@expertisefrance.fr</a>	<b>Evaluation and scoring of project proposals in 17 Latin American countries submitted under the call for projects of the EU-funded EUROCLIMA+ program under the "Resilient Food Production" component.</b> Analysis of project contexts, relevance of actions, technical and organizational feasibility, structure and content of the logical framework, budgets, etc. Financing expertise from France and GIZ.

September 2017 to July 2018	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Implementation of Fondo Para la Paz's "earthquakes and storms" emergency aid campaign in Chiapas.</b> Identification of damaged school infrastructure and risk assessment in 10 indigenous communities after the earthquake of September 7, 2018, in the Highlands region of Chiapas State, Mexico. Development and implementation of participatory diagnostic and planning methods for the rehabilitation and reconstruction of 8 school centers with private funding (Scotiabank, MetLife, Fondo Unido Mexico). Administrative validation of the construction projects and monitoring of the execution of the corresponding works.
December 2016 to November 2017	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	Co-drafting of the Declaration of Civil Society Organizations of the COP13 of the UN Convention on Biological Diversity. Participation as an accredited observer in the working groups and contact group on Article 8j of the CBD. Contributed to the definition of the civil society representation mechanism of the Forum of Latin American and Caribbean Countries on Sustainable Development organized by ECLAC. Animation of the Mexican working group of the 8th Latin American meeting on community water management.
August 2016 to June 2018	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Development of the production and commercialization of specialty coffee</b> (evaluated according to the Coffee Alliance standard of excellence) in 6 indigenous communities of the Altos de Chiapas. Diagnosis of the production, primary processing and marketing of 148 small producers, capacity building through a producer-to-producer training method, introduction of new selection and primary processing methodologies, establishment of local quality and traceability procedures, and marketing support.
July 2016 to July 2018	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Promotion of agroecological best practices for the diversification and ecological intensification of traditional Mayan agricultural systems</b> (milpa) in 3 indigenous communities in the Chiapas Highlands. Realization of plot diagnoses and dissemination of conservation agriculture techniques to 21 corn and bean producers (erosion control, water flow restoration and soil reconstruction). Establishment and monitoring of 2 demonstration plots and 2 educational plots in a mixed fruit and vegetable system in secondary schools in the region. Project carried out in partnership with the International Maize and Wheat Improvement Center (CIMMYT).
March to December 2015	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Diversification and ecological intensification of domestic food production by setting up 200 family vegetable and poultry production units.</b> Realization of community diagnoses in partnership with the Mexican Institute of Social Security, bibliographic study of the local economic and agricultural context, financial analysis, implementation and monitoring of the project. Co-financed by the Federal Ministry of Agriculture, Livestock, Rural Development, Fisheries and Food (SAGARPA).
February 2015 to August 2016	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Feasibility study for the implementation of a municipal waste management plan in Pantelhó, Chiapas.</b> Development of tenders and supervision of four complementary studies: 1. Diagnosis of household waste generation at the municipal level. 2. Characterization of waste management practices and assessment of corresponding health and environmental risks. 3. Financial analysis of three possible management scenarios at the municipal level. 4. Characterization of community waste management practices and assessment of the social acceptability of a municipal waste management plan. Analysis of the political and institutional context of waste management in Mexico and Chiapas. Organization of a roundtable to present the results to political actors and to the main donors who could participate in the initiative.

January 2015 to March 2017	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	In collaboration with the Mexican Institute of Ecology and Climate Change, <b>development and management of 4 methodological guides for community technicians</b> : 1. Facilitation and animation of community meetings. 2. Realization of participatory diagnoses of territory. 3. Participatory planning of the territory. 4. Development of community projects. Training of the Fondo Para la Paz field teams.
August 2014 to December 2017	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Development of the project and participation in the steering committee of a joint initiative to promote food sovereignty in 3 municipalities in the Highlands of Chiapas, through the implementation of short food circuits linking school food to local groups of producers and cooks.</b> Project carried out in the framework of an alliance of 13 local civil society organizations. Fundraising, administrative and financial follow-up, animation of local groups, operation of a community canteen project and participation in two regional forums on food sovereignty.
May to December 2014	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Formalization of the theory of change of the Fondo Para la Paz sustainable community development program.</b> Definition of the program's objectives and intervention variables, identification of the context variables to be considered and the assumptions underlying the intervention. Characterization of the programmatic and organizational actions to be implemented, creation of a conceptual map of program effects. Training of the field teams for the implementation of the program.
November 2013 to May 2014	Mexico Fondo Para la Paz, I.A.P.	Program Manager Magali JAUREGUI +52 1 55 4094 4946 <a href="mailto:magali.jauregui@fondoparalapaz.org">magali.jauregui@fondoparalapaz.org</a>	<b>Opening of a new regional community development program for the indigenous populations of southern Mexico (Chiapas).</b> Analysis of the historical, geographical, socio-economic and cultural context, search for local partnerships, field visits, establishment of collaboration agreements with local authorities, recruitment of a local bilingual team, opening and equipping of a field operation base, implementation of operational and security protocols, participatory diagnoses in the participating communities, administrative management of the program and fundraising.
September to October 2013	United Kingdom Global Witness	Consultant Alexandra PARDAL (Global Witness) +44 (0) 207 49 25 863 <a href="mailto:apardal@globalwitness.org">apardal@globalwitness.org</a>	<b>Analysis of value chains associated with industrial logging in the Congo Basin</b> (DRC, CAR, Gabon, Cameroon and Republic of Congo). Characterization of international flows of logs, lumber and plywood from the region. Identification of market shares held by major producer groups and intermediaries. Characterization of the origin of capital invested in sub-regional production and processing.
May to June 2013	Mexico CONANP	Technical assistant Rodrigo FLORES (CONANP) <a href="mailto:rodrigo.flores@conanp.gob.mx">rodrigo.flores@conanp.gob.mx</a>	<b>Technical assistant in the international cooperation department of the National Commission for Protected Natural Areas (CONANP).</b> Elaboration of conceptual notes and answers to calls for tenders for the financing of voluntary protection systems based on the experience of regional natural parks in France, in relation with the French Development Agency (AFD).
January to May 2013	United Kingdom Global Witness	Policy Analyst Alexandra PARDAL (Global Witness) +44 (0) 207 49 25 863 <a href="mailto:apardal@globalwitness.org">apardal@globalwitness.org</a>	<b>Preparatory study on French official development assistance to the forestry sector in the Congo Basin</b> (DRC, CAR, Gabon, Cameroon, Republic of Congo). Characterization of the French ODA system, identification of the financial volumes and the main actors involved. Scientific review and case study on the socio-economic and environmental impacts of forest management and certification mechanisms. Evaluation of the economic viability of tropical forest certification and its penetration on international markets. Production of a comprehensive argument and guidelines for proposing better policy direction.

August to November 2012	Cameroon Greenpeace Forestry Network	Campaign Analyst Frédéric AMIEL (Greenpeace France) +33 (0) 6 37 72 30 05 <a href="mailto:dekou@hotmail.com">dekou@hotmail.com</a>	<b>Analysis of a land conflict related to the controversial establishment of an industrial oil palm plantation in the Southwest Province of Cameroon.</b> Field survey on the actors involved and their respective strategies. Geolocation and documentation of the progress of the plantation project. Assessment of local security conditions. Identification of potential and proven conflicts of interest between local political actors. Creation and strengthening of partnerships with local and national Cameroonian civil society organizations.
May to August 2012	Cameroon Greenpeace Forestry Network	Campaign Analyst Frédéric AMIEL (Greenpeace France) +33 (0) 6 37 72 30 05 <a href="mailto:dekou@hotmail.com">dekou@hotmail.com</a>	<b>Evaluation of the potential of cocoa agroforestry based on agroecological principles as a sustainable alternative to industrial palm oil exploitation</b> in southwestern Cameroon. Characterization of value chains and assessment of the sustainability of local agroforestry production, including cocoa, NTFPs and traditional palm oil. Modeling of the territory and analysis of underlying demographic, social, economic and environmental dynamics. Retrospective analysis of intentional management practices applied to natural resources and the environment. Analysis of traditional and regulatory systems of access to natural resources and land.
February to April 2012	India Agroparistech executive	Research Intern Pierre-Marie AUBERT (Agroparistech) + 33 (0) 6 77 07 67 02 <a href="mailto:aubert.pm@gmail.com">aubert.pm@gmail.com</a>	<b>Environmental foresight in partnership with the University of Agricultural Sciences of Bangalore. Territory modeling and characterization of land use dynamics in Kodagu district (Karnataka),</b> strategic analysis of environmental management, prospective study for the implementation of payments for environmental services (PES) in the framework of a watershed management policy, aiming at disseminating good practices applied to agroforestry coffee production and community forest management by indigenous communities.
January 2012	France National Tropical Forest Group (NTFG)	Reporter Stéphane GUENEAU (CIRAD) +55 61 991 19 10 50 <a href="mailto:stephane.gueneau@cirad.fr">stephane.gueneau@cirad.fr</a>	<b>Contribution to the third report of the National Tropical Forest Group</b> , in the framework of a collaboration between Agroparistech Executive and CIRAD. Participation to the National Conference on Tropical Forests organized by the French Ministry of Foreign Affairs, compilation of interventions, writing of synthesis notes and integration of the final report.
March to June 2010	France CEFE-CNRS	Research Intern Franck RICHARD (CEFE) +33 (0) 4 67 61 32 62 <a href="mailto:franck.richard@cefe.cnrs.fr">franck.richard@cefe.cnrs.fr</a>	<b>Analysis of the social acceptability of the creation of a Natura 2000 conservation area in the Pic Saint Loup region.</b> Characterization of the institutional relations between the public actors and the stakeholders involved in the territory and their respective objectives. Examination of the community stakes of conservation of the local natural habitats and their biodiversity, as well as the social representations and uses associated with them at the local level. Production of recommendations to the steering committee on behalf of the Centre d'écologie fonctionnelle et évolutive du Centre national de la recherche scientifique (CEFE-CNRS).
May to August 2009	Indonesia CIRAD	Research Intern Jean-Pierre CALIMAN (CIRAD) +62 811 75 76 38 <a href="mailto:j-p-caliman@smart-tbk.com">j-p-caliman@smart-tbk.com</a>	<b>Development and testing of a plant biodiversity assessment protocol in a large-scale, RSPO-certified experimental oil palm plantation</b> (Golden Agri Resources, Sinar Mas tbk group) in Indonesia (Riau, Sumatra). Implementation of sampling procedures, creation of a botanical reference collection, data analysis, and training of the staff in charge of the project monitoring.
July to August 2008	Burkina Faso NGO CARI	Project Manager Patrice BURGER (CARI) +33 (0)4 67 55 61 18 <a href="mailto:contact@cariassociation.org">contact@cariassociation.org</a>	<b>Evaluation of the implementation of agroecology techniques</b> transferred by a seminar "Agroecology, rural development and the fight against desertification" organized by CARI in Burkina Faso, with the participating organizations.

July to August 2007	Burkina Faso NGO CARI	Project Manager Patrice BURGER (CARI) +33 (0)4 67 55 61 18 <a href="mailto:contact@cariassociation.org">contact@cariassociation.org</a>	<b>Organization of a training seminar "Agroecology, rural development and the fight against desertification"</b> for professional and civil society organizations in Burkina Faso. Identification of potential participants and their specific expectations, search for local partnerships. Selection of possible hosting structures, identification of the main logistical elements to be taken into account and estimation of the associated costs.
