

1. **Name :** HAENTJENS

2. **First names:** Eva, Luna

3. **Date of birth:** 26/09/1991

4. **Nationality:** French

5. **Marital status:** Married

6. **Contact:** e.haentjens@salvaterra.fr
+33 6 78 61 97 72
6 rue de Panama 75018 Paris

7. Diplomas:

Institutions	Dates	Diplomas
ISTOM - School of International Agri-Development	2009 - 2014	Diploma in in tropical agriculture and rural development, specialized in: "Territories, risks management and land planning"

8. Languages (1 - excellent; 5 - basic) :

<i>Languages</i>	<i>Read</i>	<i>Spoken</i>	<i>Written</i>
French	5	5	5
English	5	5	5
Portuguese	5	5	5
Spanish	5	5	5
Indonesian	1	2	1

9. Other skills: Windows/Mac/Linux. Word, Excel, PowerPoint and free equivalents. GIS: MapInfo, Quantum GIS. Database processing: Access

10. Current position: Agriculture, forestry and environment expert at SalvaTerra

11. Number of years' experience: 9 years

12. Main qualifications:

Agriculture; Livestock; Spatial planning; Cartography; Environment and natural resource management; Climate change impact studies; Concerted action; Support modelling; Resilience; Mitigation & adaptation to climate change; Capacity building for development players; Structuring the sector; Support for professional agricultural organisations; Surveys in rural areas; Monitoring and evaluation of development projects; Agroecology.

Context analysis, territorial studies, landscape approach, participative and collaborative methods, sociology of organisations and analysis of stakeholder strategies: Analysis of agricultural, food and economic issues, as well as political, cultural, security and social issues, etc. (Cambodia, Madagascar, Brazil, Indonesia); participatory, multi-sectoral, inclusive approach; mapping of knowledge, issues and stakeholders (Cambodia, Madagascar, Brazil, Indonesia); land modelling (Brazil, France); sociological and socio-economic surveys, characterisation of stakeholder games (France, Madagascar, Brazil); participatory and collaborative methodologies for community diagnosis and planning (Cambodia, Brazil, Indonesia).

Training, consultation, facilitation & advisory support for rural development projects: one-off advisory support to enhance the impact of field activities (Madagascar, Indonesia); agroecology, erosion control and fire-fighting (Madagascar, Brazil, Indonesia); adaptation and mitigation to climate change.

Agricultural, forestry and artisanal value chains in developing countries: non-timber forest products, palm oil, cassava, beef, poultry, rice, fisheries resources, wood energy and improved cooking.

13. Professional experience:

Date	February 2020 to present
Location	France, frequent missions
Company	SalvaTerra
Position	Agriculture, forestry and environment expert
Description	<p>Expertise in agriculture, climate, forestry and rural development: value chain analysis, climate change vulnerability assessments, farmers' organisations/cooperatives, climate change mitigation, carbon balance, studies on bioenergy and improved stoves:</p> <ul style="list-style-type: none"> - WFP – Senegal – 07/24 to 12/24: Decentralised evaluation of 4R programme in Senegal - Expertise France - Guinée - 24/02 (in progress): Studies on the structuring and conditions for the development of (i) a Guinean broiler industry, (ii) a laying hen industry and (iii) the potential and conditions for the local production of poultry feed. - AFD - Cambodia - 01/24 to 24/03: Mid-term assessment of greenhouse gas emissions from the WAT4CAM irrigated rice-growing project. - WFP - Guinea - 23/03 to 23/12: Final external evaluation of the country strategic plan, including the following components: school feeding based on local purchases; nutrition; emergency response; resilience of small producers and their organisations, from 2018 to 2023 and a total budget of 121 million US dollars. - France bois forêt - France - 22/12 to 23/04 (Backstopping): Evaluation and lessons learned from the Douglas fir structuring and development programme - AFD/AFEID - World - 22/11 to 23/10: Methodological support to systematize a carbon assessment approach adapted to rice growing for all irrigated rice-growing projects in AFD's portfolio and analysis of project alignment with the Paris Agreement. - ARAA/ECOWAS - 15 ECOWAS countries - 22/09 to 23/11: Study on financing mechanisms for the agro-ecological transition in West Africa: mapping of existing mechanisms and identification, through case studies, of the success factors and constraints to scaling them up. - France bois forêt - France - 22/03 to 22/05: Evaluation of the seed resource programmes carried out since 2018 and funded by the maritime pine specialised section. - Better Cotton Initiative - World - 21/11 to 22/02: developing a soil health indicator and setting an appropriate target for improving practices at the BCI country level. - World Bank - Niger - 21/01 to 21/08: Development of a Partnership Plan and an Investment Plan for the implementation of Niger's NDC: Mapping of projects; Drafting of an assessment of the implementation of the NDC, gaps and constraints; Development of the Partnership Plan and the Investment Plan. - ENABEL - Mozambique - 21/11 to date: Study on sustainable access to energy in Mozambique, greening the charcoal value chain. - Pur Projet - Kenya - 21/08 to 22/01: Improvement of an improved chimney stove (ICS) model before distribution to members of the Cherara cooperative: prototyping, water boiling tests and cost-benefit analysis. - AFD - Guinea - 21/07 to 21/09: Final evaluation of the project to consolidate an improved cookstove sector (COFIFAM) in Lower Guinea. - Expertise France, AMCC+ - Guinea Bissau - 20/11 to 21/03: Initial diagnosis of the areas for revision of the Nationally Determined Contribution: critical analysis of the data sources available for the revised greenhouse gas inventory, data collection in the priority sectors of the NDC on mitigation, analysis of the needs for strengthening government institutions. - Project to improve energy services - Benin - 20/09 to 21/09: Study of draft standards and proposal for a strategy to organise the ICS sector: Analysis of the ICS sector and its uses, proposal for guidelines for the new standard for biomass ICS. - Pur Projet - Kenya - 20/06 to 21/03: Feasibility studies for the dissemination of ICS to coffee growers, within the Cherara Co-operative Union - Kericho County: Baseline study on the promotion and use of ICS at national and regional level, identification of promising ICS, evaluation of performance and user satisfaction (Kitchen Performance Tests, etc.), recommendations. - Pur Projet - Uganda - 20/06 to 21/03: Feasibility study for the dissemination of ICS to coffee growers belonging to the Rwenzori Farmers' Cooperative Union - Kasese / Fort Portal region: Baseline study on the promotion and use of cookstoves at national and regional level, identification of promising ICS, evaluation of performance and user satisfaction, recommendations. - AFD - Dominican Republic - 20/03 to 21/12: Expert in sustainable agriculture and adaptation for studies: (i) Adaptation of the agricultural sector to CC. Characterization and vulnerability assessment

	<p>of 6 agricultural value chains, multi-criteria analysis to select 2, socio-economic and gender impact analysis and definition of an adaptation action plan. (ii) Development of climate services for the agricultural sector.</p> <ul style="list-style-type: none"> - AFD - Madagascar - 20/03 to present (backstopping): Feasibility study for a sustainable and conservation agriculture programme (Talaky be). Analysis of the value chain (coffee, fruit, vanilla, cloves, etc.) and evaluation of agricultural organizations/cooperatives. - IUCN - Cameroon - 20/03 to 20/05 (backstopping): Analysis of the context, opportunities, options and challenges for establishing and promoting responsible and sustainable value chains in the extractive industries and non-timber forest products (NTFP) sectors. - France bois forêt - France - 20/03 to 20/07: Feasibility study to identify the conditions and strategic directions for accelerated development of the eMOBOIS wood procurement programme. - Better Cotton Initiative - 20/02: Production of training materials on climate change adaptation and mitigation techniques (climate-smart agriculture) and strategies for financing climate projects for players in the cotton sector.
--	---

<i>Date</i>	January 2017 to December 2018
<i>Location</i>	Indonesia (Sumatra)
<i>Company</i>	SPKS - CIRAD
<i>Position</i>	Independent consultant
<i>Description</i>	<ul style="list-style-type: none"> - Study of the production basin and the oil palm sector in Indonesia. Study of the origins and establishment of oil palm by smallholders (adoption and dissemination of innovation). Support for the development of the SPKS farmers' organisation by drawing up replanting strategies and strategic data protection plans. - Management of field implementation and data collection for the census and characterisation of small-scale oil palm growers. - Training and support for SPKS survey teams in palm agronomy, survey methods and GIS. Project planning, participatory mapping and plot surveys in Riau province.

<i>Date</i>	June 2016 to December 2016
<i>Location</i>	France
<i>Company</i>	LabEx Dynamiques et Territoires
<i>Position</i>	Expert in support mobilisation
<i>Description</i>	<ul style="list-style-type: none"> - Setting up a "serious game" to enable players in the energy transition process to build strategies at local level as part of TEPOS (Positive Energy Territories) projects, with a particular focus on the sustainable management of forests for firewood (wood chips, RCW, etc.) and wind power. Coordinating and leading consultation sessions with stakeholders in the wood industry. - Study of the structure of the French wood-energy sector and the regulatory frameworks resulting from the law on the energy transition for green growth in order to assess the possible use of a "serious game" in the energy transition process. - Setting up a "serious game" for the concerted and sustainable management of agricultural areas.

<i>Date</i>	March to October 2014
<i>Location</i>	Brazil
<i>Company</i>	CIRAD
<i>Position</i>	Project Manager
<i>Description</i>	<ul style="list-style-type: none"> - Implementing the companion modelling approach (ComMod) by coordinating and leading sessions to co-construct a 'serious game' to model the impacts of climate variations on land dynamics and agro-extractivist production systems. - Assessment of rural communities' ability to adapt to CC. - Study of agro-extractivist activities in deforestation zones.
